

A33 QUAD-CORE PROCESSOR

Quad-Core Mobile Application Processor

The Allwinner A33 is an extremely efficient quad-core mobile application processor designed to bring impressive performance to your leading-edge mobile device with low power consumption. It is pin-compatible with Allwinner's dual-core A23 processor.

The A33 features quad Cortex™-A7 CPU cores to enable the best balance between high performance and power efficiency, and packs the mature and leading GPU technology to deliver amazing graphics, fluid video and immersive gaming experiences. With outstanding multi-format 1080p HD video processing capability, WXGA display support, SmartColor display technology, 5MP image sensor support, and advanced DDR technology, the A33 delivers performance beyond expectations. Security system is supported to provide digital content protection.

Allwinner designed the A33 to enable stunning battery life experiences for end-user devices. A33 achieves lower power through a balanced combination of several features: ultra energy-efficient Cortex™-A7 CPU cores, an advanced fabrication process, optimized DVFS technology, and a unique Talking Standby Mode that allows extremely low power consumption during voice calls. Allwinner's A33 also comes with a wide range of connectivity including 4-lane MIPI DSI, LVDS, USB OTG/HOST, SD/MMC, I2S/PCM and RSB, etc, significantly reducing system cost and

ABOUT ALLWINNER: Allwinner Technology is a leading silicon design company dedicated to smart application processor SoCs and smart SoC for ICs. Its product line includes multi-core application processors for smart devices and smart power management ICs used by brands worldwide.

With its focus on cutting edge UHD video processing, high performance multi-core CPU/GPU integration, and ultra-low power consumption, Allwinner Technology is a mainstream solution provider for global tablet, internet TV, smart home device, automotive in-dash device, smart power management, and mobile connected device markets. Allwinner Technology is headquartered in Zhuhai, China.
